

December 15, 2020

Dear Family Members, Loved Ones, and Team Members,

This letter is to inform you that Bellaire at Stone Port continued antigen testing today for team members and for our Assisted Living residents, excluding Memory Care. Testing is still being completed for a small number of team members and Assisted Living residents.

Results from today's testing indicate that there were two new positive cases, including an Assisted Living resident and a team member. The family of the resident who tested positive has been notified. We will continue to keep you up to date on any new recommendations as put forth by the Virginia Department of Health. Bellaire at Stone Port currently has a total of 8 positive cases- four Assisted Living residents and four team members. We will keep you informed of additional positive test results as they become available.

We continue to take all precautions as recommended by the Center for Disease Control and the Virginia Department of Health. At this point, we must continue to enforce the "no visitation" rule. We are committed to protecting the health and safety of our residents and team members. We understand the emotional impact that separation from loved ones can cause; however, we feel keeping these essential measures in place will continue to keep our residents and team members safe.

We do recognize that family contact and involvement are essential during these times, and we will continue to do everything we can to keep our families and residents engaged. We will continue to assist families to connect with their loved ones in creative ways, including telephone, email, virtual meetings, Facebook and Facetime.

We are thankful for our team members who are being so careful and for our family members who continue to be supportive of the restrictions we have in place. Please call us at 540-246-0888 if you have any questions.

With regards,

Cristen Hackenbracht
Executive Director
