

March 18, 2021

Greetings,

This letter is to inform you that, today, one of our team members tested positive for COVID-19 using the Rapid Antigen Test. This team member, who does not provide direct care to our residents, last worked at our community this morning. It has been determined that the risk of transmission to residents and staff is low. This team member will be out for a minimum of 10 days and must be fever free and showing improvement of symptoms in order to return to work.

It has been confirmed, based on the results of additional testing, that the resident who tested positive yesterday using the Rapid Antigen test does have COVID-19. Because we currently have two positive cases in our community, the Virginia Department of Health recommends we test all team members and residents weekly until we have zero new positive cases in a 14-day period.

We will continue to pause indoor visitation, communal dining and group activities at this time. We are happy to accommodate, window visits, video conferencing and phone calls. Please call our concierge at 540-246-0888 to arrange visitation.

Please feel free to reach out if you have any questions. Thank you for your continued patience.

Sincerely,

Cristen Hackenbracht
Executive Director
