

June 5, 2021

Greetings,

This letter is to inform you that, today, one of our team members tested positive for COVID-19. This team member last worked in our building June 1 and followed proper protocol by wearing a mask for the duration of the shift. Since our residents are 100% vaccinated, the risk of transmission from this team member to our residents is considered low. This team member will be out for a minimum of 10 days and must be fever free and showing improvement of symptoms in order to return to work.

Because 100% of our resident population is vaccinated, our residents will continue to participate in activities and communal dining. Visitation can also continue at this time. All visitors are required to complete the screening process upon entering and must wear a mask while moving throughout our community. We will continue to monitor our residents for signs and symptoms, including once daily temperature checks.

Please feel free to reach out if you have any questions.

With regards,

Cristen S. Hackenbracht, ALFA, CDP
Executive Director
