

September 18, 2021

Greetings,

This letter is to update you on the status of our COVID testing. We currently have one resident and two team members who have tested positive for COVID-19 using the Rapid Antigen Test. The total number of cases in our building is three.

Our resident tested positive yesterday evening after displaying symptoms. Later yesterday evening and again this afternoon, two team members tested positive. One of the team members last worked in our community on 9/15 and the other last worked at our community on 9/16. Both team members will be unable to return to work for a minimum of 10 days after the date of their positive test.

We have reported these cases to the Department of Social Services and to the Virginia Department of Health. The Virginia Department of Health has recommended we test all of our unvaccinated and vaccinated residents and team members. We have completed testing for all of our residents with no new positive cases noted. Testing of our team members is still in progress at this time.

Beginning today, because we are considered an outbreak community, we will pause all visitation, communal dining and activities. Residents are asked to wear masks when outside of their apartments. We plan to complete another round of testing Tuesday, September 21st. Thank you for your patience and understanding.

Sincerely,

Cristen Hackenbracht, ALFA, CDP
Executive Director
