

September 21, 2021

Greetings Resident Families, Residents and Team Members,

I want to take this opportunity to provide you with an update as we have completed our second round of community-wide testing today. Two additional residents have tested positive for COVID-19. Both residents are fully vaccinated. Family members of both residents have been notified of the positive results. This brings the total number of positive cases in our community to six, three residents and three team members.

We are continuing to follow guidelines as set forth by the Virginia Department of Health. Contact and droplet precautions have been initiated for each resident who has tested positive for COVID-19. Additionally, unvaccinated team members who've tested positive will be unable to return to work until they've quarantined for a minimum of 10 days and are showing an improvement of symptoms and are fever-free for 24 hours without the use of fever reducing medication. We will repeat testing every 3-7 days until we reach 14 days with no new positive cases. Our next round of testing is scheduled for Monday, September 27.

We will continue to pause all communal dining, group activities and indoor visitation. Visitors are welcome to enjoy outdoor visitation with proper social distancing and masks, window visits and virtual visits through Facetime or Zoom. Please call our concierge at 540-246-0888 to arrange your visit. Visits can be held daily from 10am-6pm.

Sincerely,

Cristen Hackenbracht, ALFA, CDP
Executive Director
